I believe this is fixed. Preg diaries remained broken as it's not using pagination so the "show footer" function didn't kick in.

And regular category pages

<https://www.familyfriendlyhq.ie/home-garden/>

Footer shows once you read the bottom (about 8 loads here).

And showing also on pages that don't have enough articles to have pagination.

Actually found the bug on podcasts motherboard as well (detailed in [#299](#)). Pagination not set up correctly there, will fix. Apart from that, though
