Target version:		Spent time:	0.00 hour
Description			
Standard article.			
EG https://www.familyfriendlyhq.ie/amp/home-garden/importance-of-delegation-of-chores-8528/ Logo height. Squashed Menu inactive Ampersand & breadcrumb. H2 style, is in caps Tidy share icons Width image in body. Style caption. (Even fix size).			
Pregnancy diary post			
EG https://www.familyfriendlyhq.ie/amp/pregnancy/diary/week-39-pregnancy-diaries-7590/ Missing symptoms, size, dear diary. Rest of text rendering no formatting. Instagram post text only.			
Recipe			
https://www.familyfriendlyhq.ie/amp/food/recipes/healthy-date-oat-and-chocolate-chip-biscuits-7452/ H2 formatting. No nutritional info ingredients restrictions			
Movie review			
EG https://www.familyfriendlyhq.ie/amp/reviews/movies/men-in-black-international-8192/ similar issues as per above: Missing info, text formatting, image. Quote is good though. No video included.			

Video & how to block			
https://www.familyfriendlyhq.ie/amp/video/how-to/how-to-change-a-nappy-7737/			
Video ad feature doesn't show. How to on. Image size, formatting.			

Podcast			
https://www.familyfriendlyhq.ie/amp/podcasts/motherboard-podcast-balancing-sports-with-motherhood-7386/ Have a look but seems ok.			

History

#1 - 09/05/2019 04:04 PM - Pierce Gleeson

- Assignee changed from Pierce Gleeson to David Bryan

A large update on this. Have updated the article pages significantly, solving a lot of the above visual issues, logo sizes, breadcrumbs, fonts etc. Brought the whole thing inline to look like FFHQ on mobile (rather than EI, which is what it looked like). Also added styling for How To blocks, FAQ

blocks.

What is still outstanding:

Pregnancy diary post

This doesn't have an amhtml link so while you can generate the AMP article by manually putting it in the URL, it isn't shared with robots or users. We can return the amhtml link if we improve the article, which requires custom amp template.

Reviews

Removed the amhtml link in both of these as none of the custom movie or hotel blocks are outputting. So a lot of info missing in the amp version. As with Pregnancy Diary above, would need to write a custom amp template for reviews.

Recipes

Not possible to disable amhtml so easily on these so will have to prioritise adding a custom amp template so we aren't cutting off a lot of necessary recipe info.

Videos

Need to write a BBW formatter for amp before any BBW vids will show on AMP. Will work on this tomorrow morning?

#2 - 09/06/2019 03:57 PM - Pierce Gleeson

I've just added two new AMP features, both for BBW.

The Featured Video pages and also embedded videos will now work on AMP with an <amp-iframe>
