Description Topic pages such as: https://familyfriendlyhq.ie/topics/fasnia Are not being indexed by google - see GSC Not being referred by anywhere. Need to have Topics in the footer. Plus a Topics landing page. EG https://www.thesun.co.uk/index/ I think a similar implementation would be good here - break out by alphabetical, maybe anything with more than N number of uses, have that at the top (order by number of times used), then a view more, into a sub category of all by letter)
