"@type": "Article",

Is in here. Maybe I did this way back?

Also, the string error that was causing errors across a lot of pages (across FFHQ and EI), I fixed last week fixing up errors on Google Search Console.

great

[Newton Duarte](#) must have fixed

[Pierce Gleeson](#) - we are missing the article body part though - ie the content of the article - is that something you can add - other sections of the site should have it already, so a framework to follow please

thanks
