

CAA 2019 - Bug #446

Change of behaviour - multiple file submissions need separate certificate approvals

02/27/2020 04:42 PM - David Bryan

Description			
When a user submits more than 1 file, each is to be given separate treatment with regards separate certificates example a user submits a 30second version of the ad & a 60- second version of the ad. Whilst the user is charged only once, each file is treated as a separate submission, approved/or not separately and gets an individual reference / approval code. This is for video, storyboard & script submissions. This is for provisional and final submissions. Maximum number of files to upload = 10 Separate Trello cards for each submission Separate approval letters Submissions with multiple files can have different approval levels - eg 1 approved, one approved with restriction, one rejected. Users can, out of their multiple files submitted, revise one single file out of the group submitted. Final approvals can be either one of the previously submitted files, or both, or neither.
