All fine here. There's no linkedin sharing option available. If you want, we can implement it. Let us know.

Sorry, I didn't manage to update this yesterday, but as Newton says, think it's fine now. I'd done up a new meta title according to your doc but hadn't applied it to the twitter and facebook titles. Also stripped the HTML from the description, which was coming through incorrectly.

So, have a look again!
